

SHAJANSHA JEYAKANTHAN

Software Engineer

CAREER SUMMARY

Motivated and detail-oriented Software Engineering student with a strong foundation in modern application development, including mobile and web technologies. Experienced in building real-world projects such as finance tracking applications and portfolio platforms, with a focus on clean UI/UX and scalable architecture. Passionate about problem-solving, learning new technologies, and developing efficient, user-centered solutions. Seeking opportunities to contribute technical skills and grow as a professional developer in a dynamic environment.

PROJECTS

Expense Tracker Mobile App

- Built a cross-platform finance tracking app using Flutter
- Implemented expense categorization, data persistence, and clean UI
- Managed local data storage for real-time updates

Task Manager Mobile Application

- Developed a basic productivity app for task creation and management
- Implemented CRUD operations with a user-friendly interface
- Focused on performance and simple UX design

FitZone – Gym Management Web System

- Designed and developed a full web-based system for gym operations
- Features include member management, scheduling, and admin dashboard
- Focused on responsive design and usability

Student Attendance System (Fingerprint Integration)

- Built an automated attendance system using biometric authentication
- Integrated fingerprint hardware for accurate student tracking
- Improved reliability and reduced manual attendance errors

LuxeVista – Beach Resort Mobile Application

- Developed a mobile app for resort services and customer interaction
- Included features like booking, service browsing, and UI-focused design
- Emphasized smooth user experience and modern interface
